#### Abstract

This is an abstract

# An Earth-shattering Work Significantly Advancing the State of the Art

#### Declaration

I declare that this thesis is my own work and has not been submitted in any form for another degree or diploma at any university or other institute of tertiary education. Information derived from the published and unpublished work of others has been acknowledged in the text and a list of references is given.

Bradon Thomas Hall August 12, 2014

### Acknowledgments

I would like to thank everyone who helped to make this possible. It has been an incredible journey of self-discovery, and I love every last one of you. . .

Bradon Thomas Hall

# **Discussion Chapters**

#### Conclusion

#### Appendix A

## This appendix should get a letter

An appendix before the backmatter gets an automatically generated letter by which it can be referred to. This is Appendix A.

#### Appendix B

#### Simulation Source Code

You may want to investigate the  ${\tt lgrind}$  program and package if you wish to include source code in your thesis

#### Vita

Publications arising from this thesis include:

Author, A. and Bloggs, J. (2002), A really catchy title. In *The 31st International Conference on Non-specific Computing*. Capital City, Country.

Bloggs, J. and Author, A. (2002), A very much longer and significantly less catchy title. in *Workshop on A Research Area*. Springfield, USA.
